
Mary N. Chaney

MBS Information Security Consulting LLC

Founded in 2009, MBS provides consulting services in all things related to securing people, facilities, equipment, materials, information, activities or operations. Mary Chaney is a certified information systems security professional (CISSP), with over 20 years of information security, information technology, and legal experience. Chaney is a former special agent for the FBI where she served as the information systems security officer (ISSO) and investigated all types of cyber related criminal activities. The services that MBS provides are heavily dependent on the knowledge of its owner. Chaney noticed a gap in knowledge in proper information/cyber security practices between the government and large companies and those of small and mid-sized businesses. MBS's mission is to assist small to mid-size companies with incorporating information security best practices by providing a one-stop shop for all their security needs. MBS conducts free training sessions with area businesses on general information security awareness, social media security, cyber fraud, and combatting identity theft.
